Hasp Transparent padlock seals

MODEL NUMBER: 5018

In the market we found many similar seal,the color insert is welded by ultrasound.
we know the ultrasound welding is not perfect.
it always has false welding. we can take the color out easily.
The user lost much money.

Due to the users' concern, We made this mechanical anti-opening structure
The color hooks is pressed into the transparent body.
The four hooks works very strongly by eyes.
Nobody can tamper it .
We got the users' approval.
